BOOTS FOR FIREFIGHTERS

FHR 005

Boots for firefighters FHR 005

FHR 005 boots for firefighters are special high-safety boots intended for use in extreme conditions, including fire suppression and protection operations.

Safety:

- ★ The boots meet the requirements of the EN 15090:2012 standard for type 2 firefighter's shoes.
- ★ Third grade thermal resistance, HI3 (contact with surface temperatures of 250 °C for up to 40 minutes).
- ★ Steel-toe finished with an abrasion-resistant rubber edge, resistant to 200 J impact and 1,500 N piercing.
- ★ They are made of hydrophobic grain leather, embossed (model 005 PL) or smooth (model 005), specially impregnated, fireproof and waterproof for 180 minutes.
- ★ They ensure good visibility for the user thanks to non-combustible 3M reflective tapes.
- ★ The seams are made with non-combustible NOMEX® stitched threads.

Comfort:

- ★ IBISAFE® — a sole insert made of Kevlar®, used instead of a steel insert, makes the boots light and makes the sole non-piercable and, at the same time, flexible and provides excellent thermal insulation properties.
- ★ TE-POR® — a waterproof and air-permeable membrane that enables sweat to escape, improves hygienic characteristics, stops water, and ensures high comfort in all weather conditions.
- ★ A NITRIL® sole made of black vulcanized rubber which protects against freezing and high temperatures; it is ergonomic, antistatic, anti-slip, acid- and oil-resistant, and easy to clean.
- ★ A back and front bend zones.
- ★ Additional plastic ankle protection.
- ★ Lining around the ankles.
- ★ A leather grip for putting the boots on quickly.
- ★ A soft collar in the upper part of the boot.

Versions available in sizes 37 to 48:

- ★ 005 — slip-on boots (made from smooth leather)
- ★ 005 PL — slip-on boots (made from embossed leather)
