BOOTS FOR FIREFIGHTERS

FHR 006

Boots for firefighters FHR 006

FHR 006 boots for firefighters are special high-safety boots intended for use in extreme conditions, including fire suppression and protection operations.

Safety:

- ★ The boots meet the requirements of the EN 15090:2012 standard for type 2 firefighter's shoes.
- ★ Third grade thermal resistance, HI3 (contact with surface temperatures of 250 °C for up to 40 minutes).
- ★ Steel-toe finished with an abrasion-resistant rubber edge, resistant to 200 J impact and 1,500 N piercing.
- ★ They are made from hydrophobic grain leather, embossed (model 006 PL) or smooth (model 006), specially impregnated, fireproof and waterproof for 180 minutes.
- ★ They ensure good visibility for the user thanks to non-combustible 3M reflective tapes.
- ★ The seams are made with non-combustible NOMEX® stitched threads.
- ★ Loops used instead of hooks in the lace system prevent the risk of snagging.

Comfort:

- ★ IBISAFE® — a sole insert made of Kevlar®, used instead of a steel insert, makes the boots light and makes the sole non-piercable and, at the same time, flexible and provides excellent thermal insulation properties.
- ★ TE-POR® — a waterproof and air-permeable membrane that enables sweat to escape, improves hygienic characteristics, stops water, and ensures high comfort in all weather conditions.
- ★ A NITRIL® sole made of black vulcanized rubber which protects against freezing and high temperatures; it is ergonomic, antistatic, anti-slip, acid- and oil-resistant, and easy to clean.
- ★ JADO® — a microventilation system which ensures good thermal insulation from both cold and heat, and which is located in the upper part of the boot near the collar.
- ★ A back bend zone.
- ★ Additional plastic ankle protection.
- ★ Lining around the ankles.
- ★ A leather grip for putting the boots on quickly.
- ★ A soft collar in the upper part of the boot.
- ★ A tongue that matches human anatomy.
- ★ A system to lock the zipper in the closed position.

Versions available in sizes 37 to 48:

- ★ 006 — with a double fastening system (zipper and laces), made from smooth leather.
- ★ 006 PL — with a double fastening system (zipper and laces), made from embossed leather.
- ★ 006 N — with a double fastening system (zipper and laces), made from smooth leather, with a 5 cm shorter bootleg.
- ★ 006 PL N — with a double fastening system (zipper and laces), made from embossed leather, with a 5 cm shorter bootleg.
